

New Features

- It is now possible to indicate if a company must pay taxes during an inventory transfer. This will make taxes appear on inventory transfers.
- The PriceCharting real-time price check feature is now accessible from the product management window.

Improvements

- The invoice items' note can now be printed on the parent/child label.

Fixes

- Moneris P400 receipts now display accents properly.
- The quantity available of an item is now calculated properly in the search window and the Invoice module.
- The purchase column in the Invoice module is now unblocked in refunds when the option is activated.
- All products are now adjusted when trying to adjust multiple inventory quantities in the Inventory and Catalog.
- An issue with action required items and negative inventory items has been resolved.
- Issue with the Price Charting pop-up window not appearing has been corrected.
