

## New Features

- An option has been added to allow direct refunds of credited invoices.
- When making credit line payments, it is now possible to apply surplus amounts as credits.
- New integration with Kangaroo Rewards.

## New Configurations

- It is now possible to assign Price Charting prices to items in the invoice from the Price Charting data window using a double click.

## Improvements

- It is now possible to pay credit lines using credited invoices in the simplified view.

## Fixes

- The entity search type will no longer revert to contact after a credit margin payment.
- Fix an issue where account numbers weren't being applied properly.
