New Feature: Transaction can now be searched for using partial reference number.

New Feature: Buy and Sell totals for the past year are now displayed with the other entity statistics.

New Feature: Optional prompt to ask the user to enter a reason for which a transaction is being cancelled or modified. This option can be found in Configuration menu -> Invoice - Page 3

New Feature: Companies and Contacts can be assigned a custom code. A client number is now assigned to Companies. In the Invoice Module, scanning a client's number or code will bring it to the current transaction. In the Contact/Cie module, it will bring it up in the proper mode, regardless if it's a Contact or a Company.

New integration: Orders made in Alice can now be send directly into Cigo Tracker as Jobs.

New Feature: Item Line Total column has been added to the invoice spread. It will show qty * unit price for that line and can be used to recalculate the unit price.

Improvement: It's now possible to add refunds to orders and proposals

New Feature: A filter was added to the inventory module to quickly see consignment items.
