Improvement: The Dangerous Goods declaration has been updated to match legal requirements. The configuration has been moved to a new tab for clarity.

Improvement: A selector has been added to the Sales per Unit report to exclude products that were only refunded or in back order during the period while having units in stock. An option has been added to the Miscellaneous section to activate that selector automatically.

Correction: Fixes have been applied to the Sales Comparaison report, notably the value of the previous year's supplier purchases.

Correction: Fixes have been applied to the Sales per Employee report. Notably the refund's total, the inclusion of transaction with only refunds and bulk items in the gross margin calculation.

New feature: A report listing, in details, the companies has been added.

New feature: A report listing, in details, the contacts has been added.

New: It's now possible to clone Roles, Proposal Templates, Product Attributes, Kit Templates, Price Lists and all Service types.
